

CREATE IBM WATSON IOT PLATFORM AND DEVICE

Date	30 September 2022
Team ID	IBM-Project-PNT2022TMID38545
Project Name	IoT Based Safety Gadget for Child Safety Monitoring & Notification

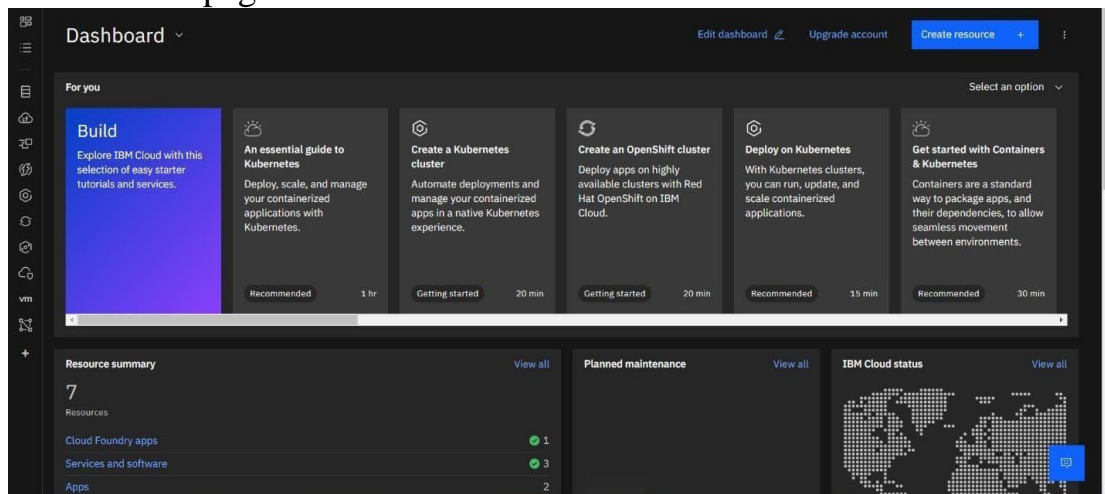

1. To create the IBM Watson IOT platform and device

STEPS:

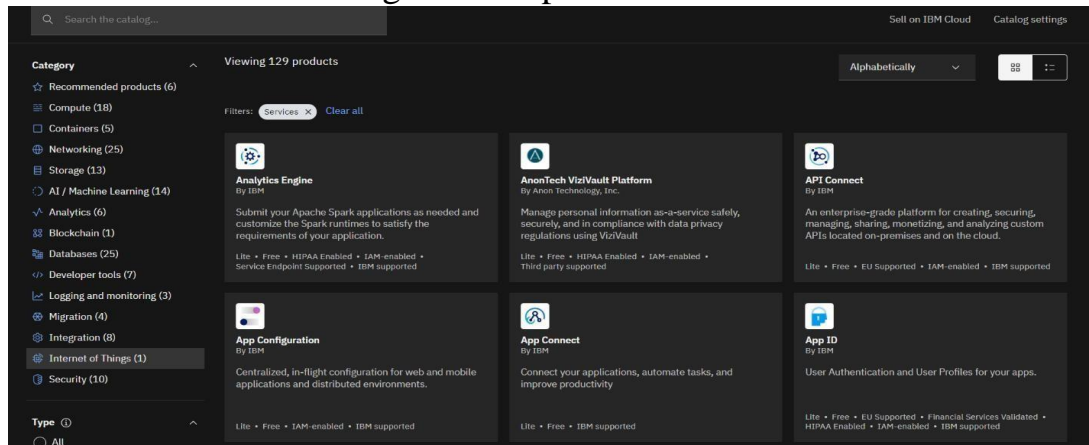

1. create an IBM cloud account with the individual IBM id and password

2. Home page of IBM cloud

3. Click on the catalog on the top

4. Click on IoT in the category mentioned

Internet of Things Platform

This service is the hub of all things IBM IoT, it is where you can set up and manage your connected devices so that your apps can access their live and historical data.

Create | About

Type: Service

Provider: IBM

Updated on: 08/15/2022

Category: Internet of Things

Compliance: IAM-enabled

Location: Frankfurt, London, Dallas, Washington DC

Related links: Docs, Terms

Select a location: **Dallas (us-south)**

Select a pricing plan: Displayed prices do not include tax. Monthly prices shown are for country or location: [United States](#)

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

The Lite service plan for Internet of Things Platform includes up to 500 registered devices, and a maximum of 200 MB each of data exchanged, data analyzed, and edge data analyzed per month.

Existing Lite plan instance

You can have only 1 Lite plan instance of this service per resource group. [Delete](#) your current Lite plan instance in Default resource group to create a new one, or [view the existing instance](#).

☐ I have read and agree to the following license agreements: [Terms](#)

7. click create

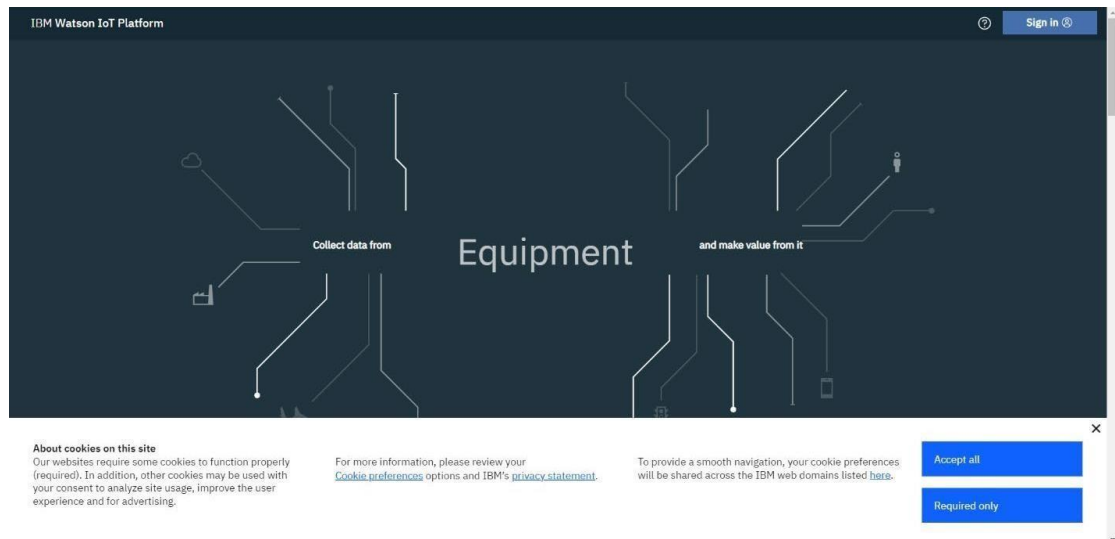

8. Internet of Things Platform Child safety will be created, where there are different options like manage, plan, and connection

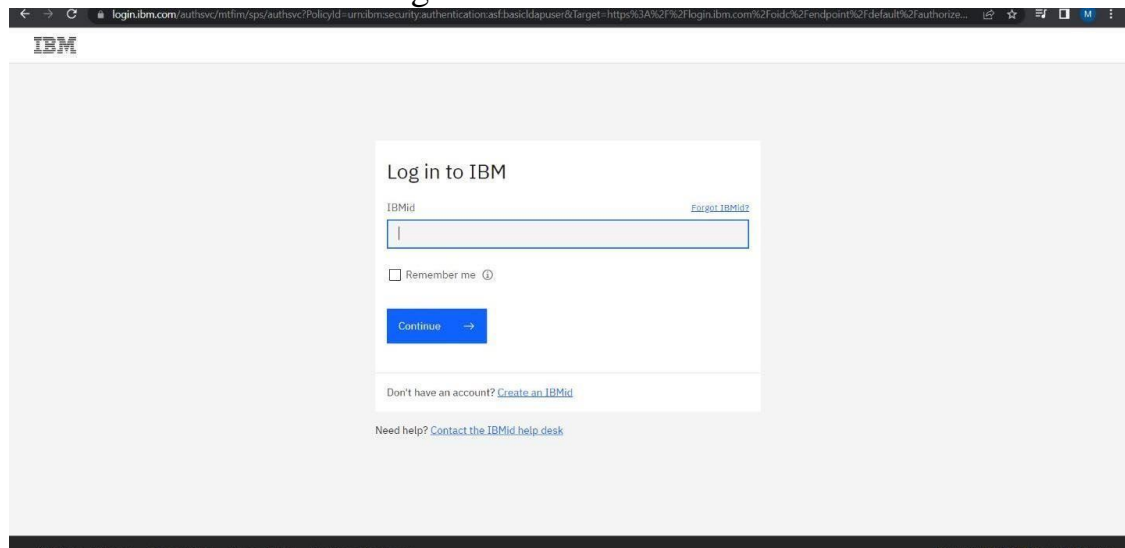

9. manage is for launch, plan gives us the idea about the payment package and its upgrades, and lastly the connection is for to connect IOT with other services

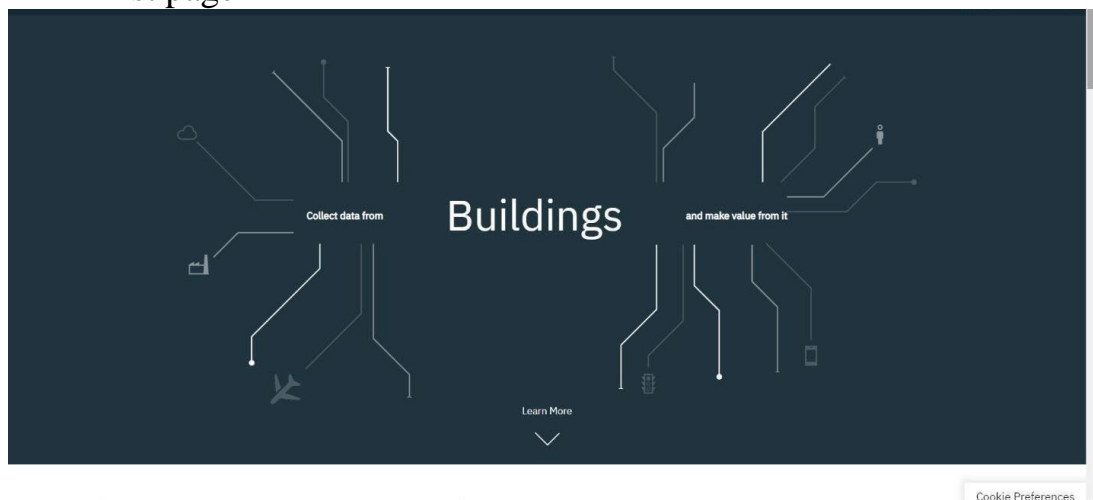

10. Click on the launch button in the manage tab, it will open to this

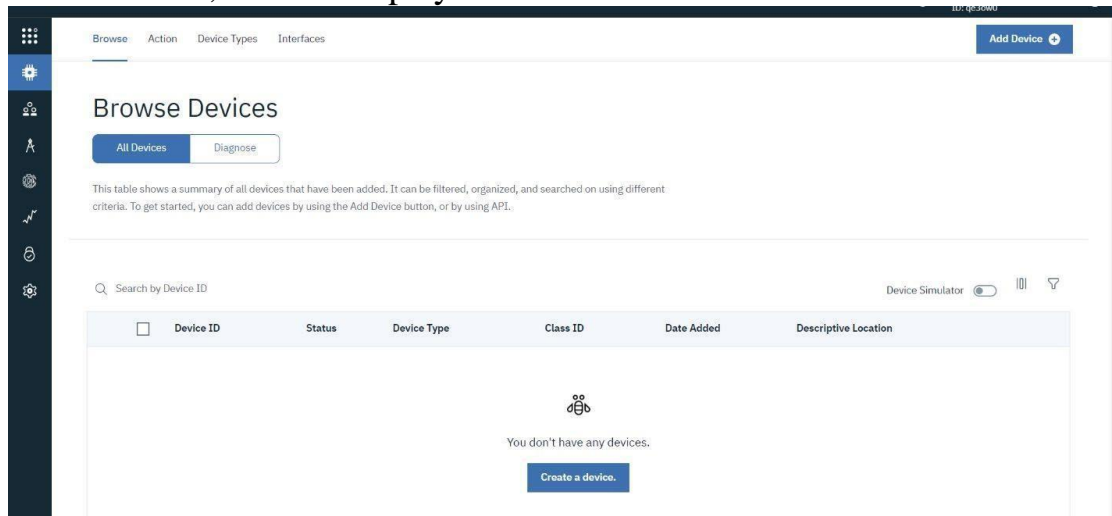

11. Enter the details to sign in to the Watson Cloud to create a device

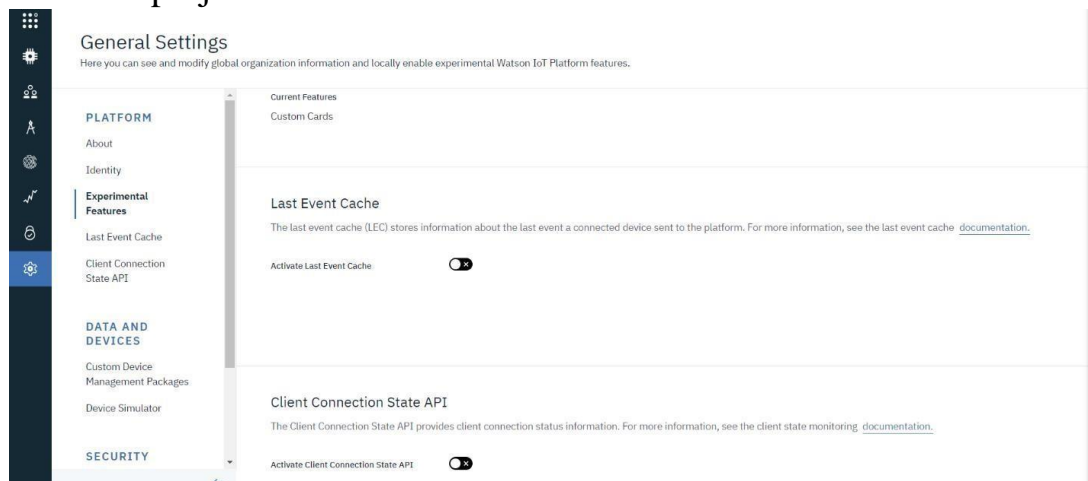

12. Once logged in the name will be displayed and it goes back to the first page

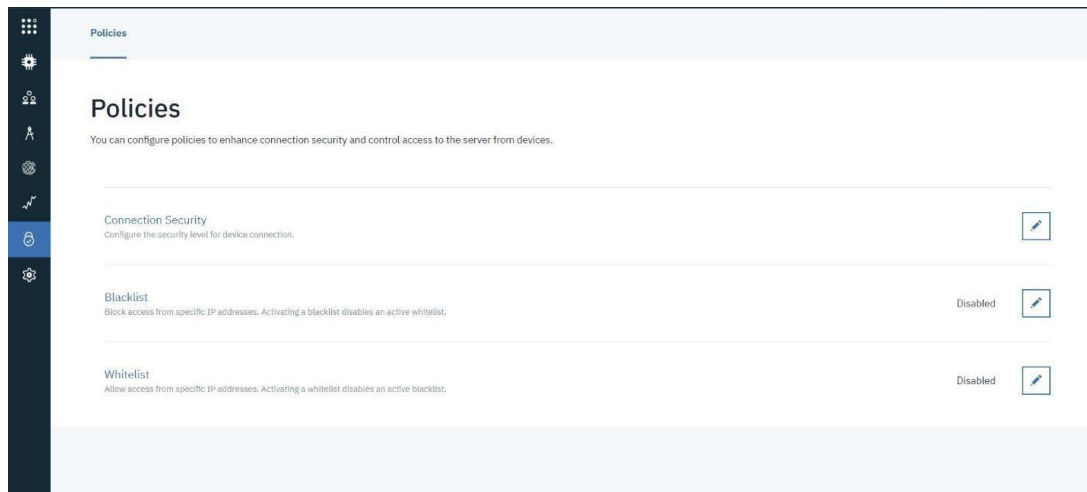

13. And again clicking on the launch button will open this tab, the device will help in the creation of the devices, the addition of devices, and the display of details of the devices.

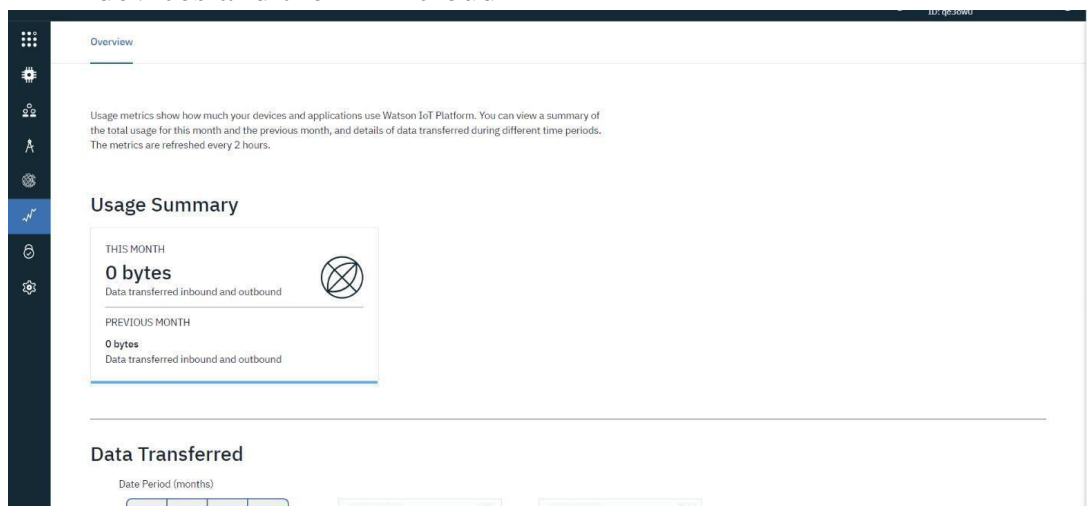

14. The setting tab is used to change the general setting if needed for the project.

15. In the security tab we can choose the type of security connection and can change according to specification

16. Usage gives the summary of how many bytes are used between the devices and the IBM cloud

17. The member tab is add the teams members to work in the platform

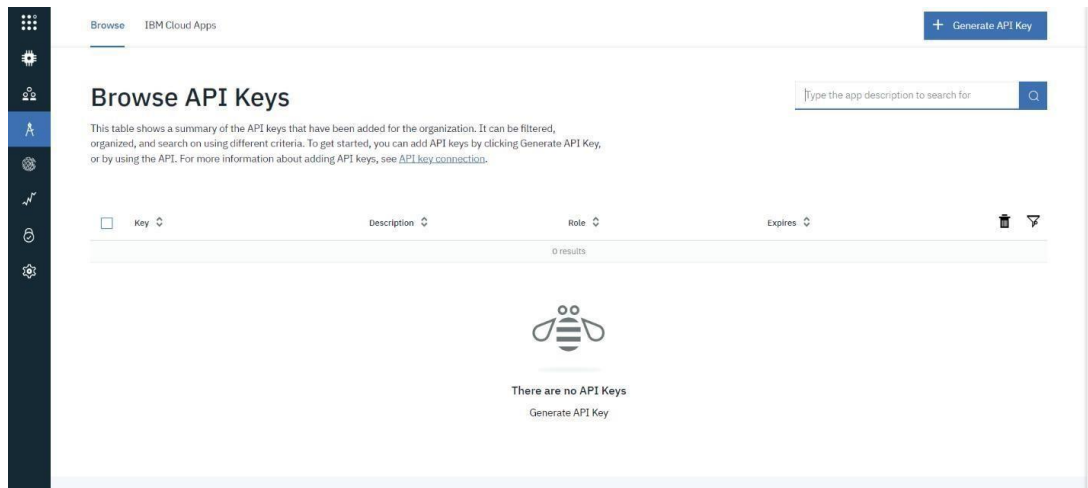

Browse Members

Type the member email to search for

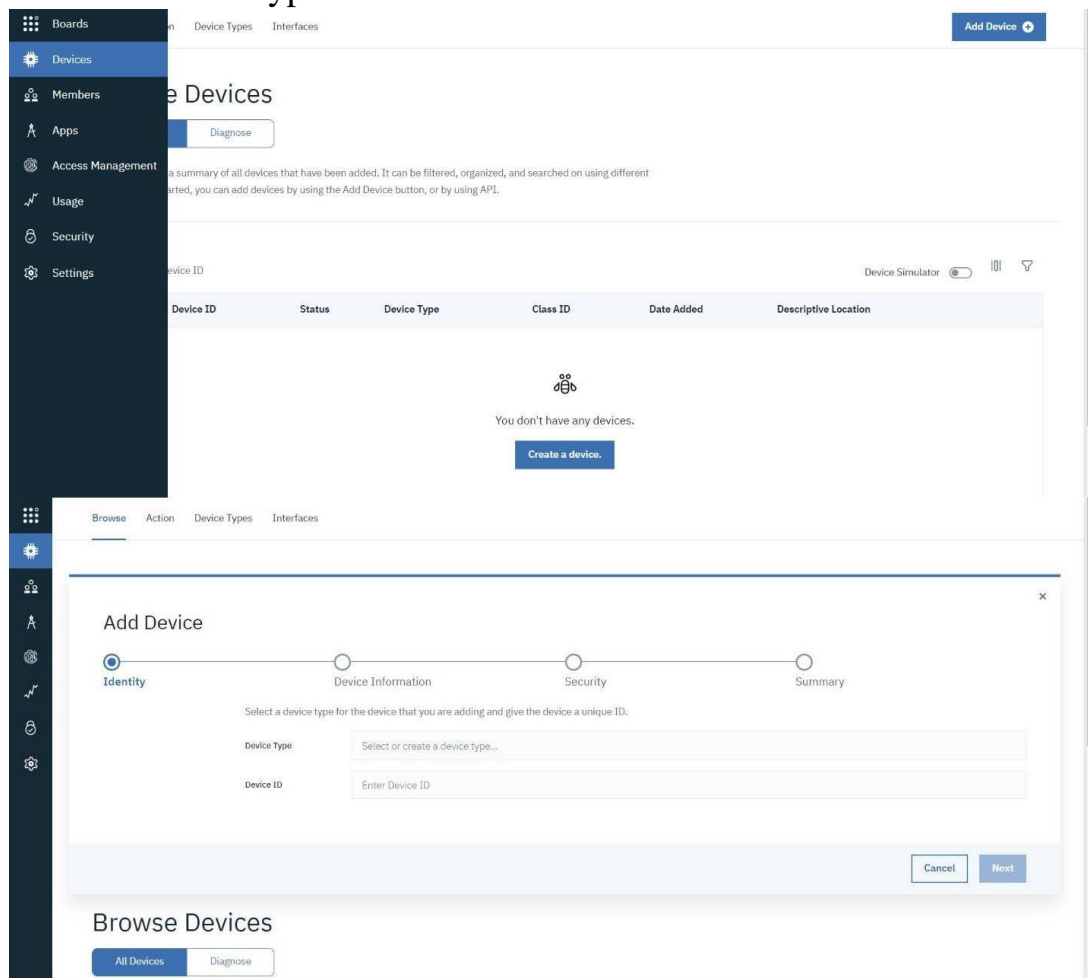

This table shows a summary of the members of the organization. It can be filtered, organized, and search on using different criteria. To get started, you can add members by clicking Add Members, or by using the API. For more information about members, see [Managing user access](#).

<input type="checkbox"/>	Email Address	Name	Role	Added By	Expires	
1 result						
<input type="checkbox"/>	worldisfullofmeow@gmail.com	worldisfullofmeow@gmail.com	Administrator	-	-	

18. This tab is used when you want to connect to some other platform and to integrate with other services.

19. Click on the device tab and click on the add device button, then give the device type and device id and click next

20. This page to enter extra details and of the hardware

Add Device

Identity **Device Information** Security Summary

You can modify the default device information and enter more information about the device for identification purposes.

Serial Number

Model

Description

Hardware Version

Manufacturer

Device Class

Firmware Version

Descriptive Location

[Add Metadata](#)

[Back](#) [Next](#)

21. Clicking next it goes to the security where we do authentication token id.

Add Device

Identity **Device Information** **Security** Summary

There are two options for selecting a device authentication token.

Auto-generated authentication token (default)

Allow the service to generate an authentication token for you. Tokens are 18 characters and contain a mix of alphanumeric characters and symbols. The token is returned to you at the end of the device registration process.

Self-provided authentication token

Provide your own authentication token for this device. The token must be between 8 and 36 characters and contain a mix of lowercase and uppercase letters, numbers, and symbols, which can include hyphens, underscores, and periods. Do not use repeated characters, dictionary words, user names, or other predefined sequences.

Authentication Token

Make a note of the generated token. Lost authentication tokens cannot be recovered. Tokens are encrypted before being stored.

Authentication tokens are encrypted before we store them.

[Back](#) [Next](#)

22. Clicking on next it goes to the summary of the device then click finish

Add Device

Identity **Device Information** **Security** **Summary**

Verify that the following information is correct then select Finish

Device Type
NodeMCU

Device ID
199795

[View Metadata](#)

Security Token
1997199520012005

[Back](#) [Finish](#)

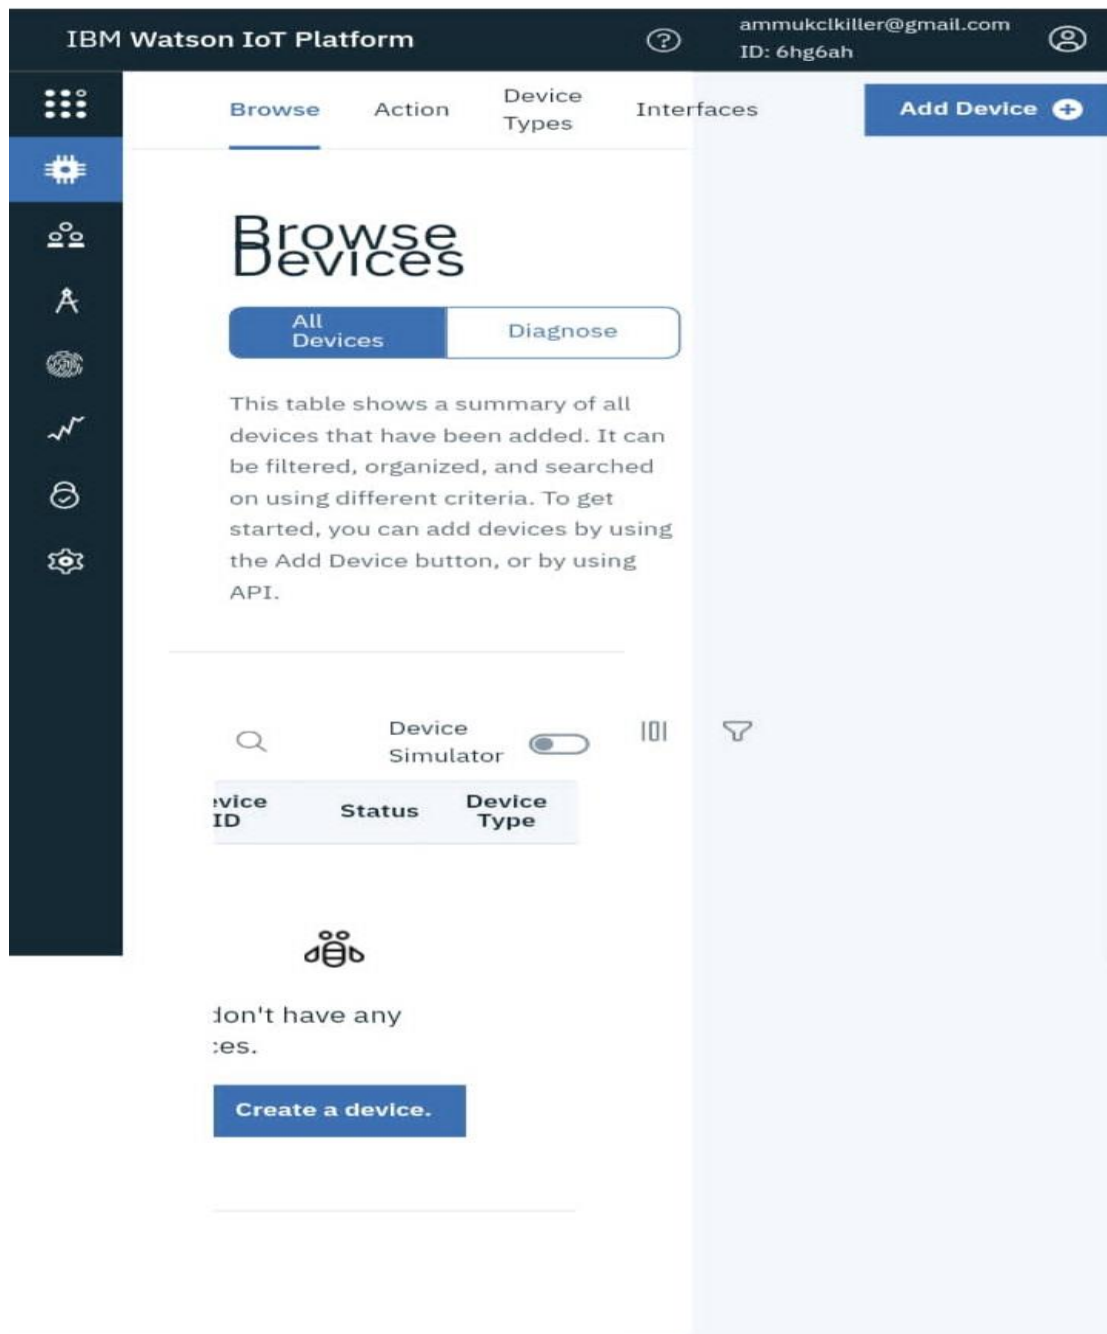

23. The device credentials will be displayed with all the details

24. Save the details of the device as the authentication tokens are non-recoverable and if misplaced then we have to create a new one.

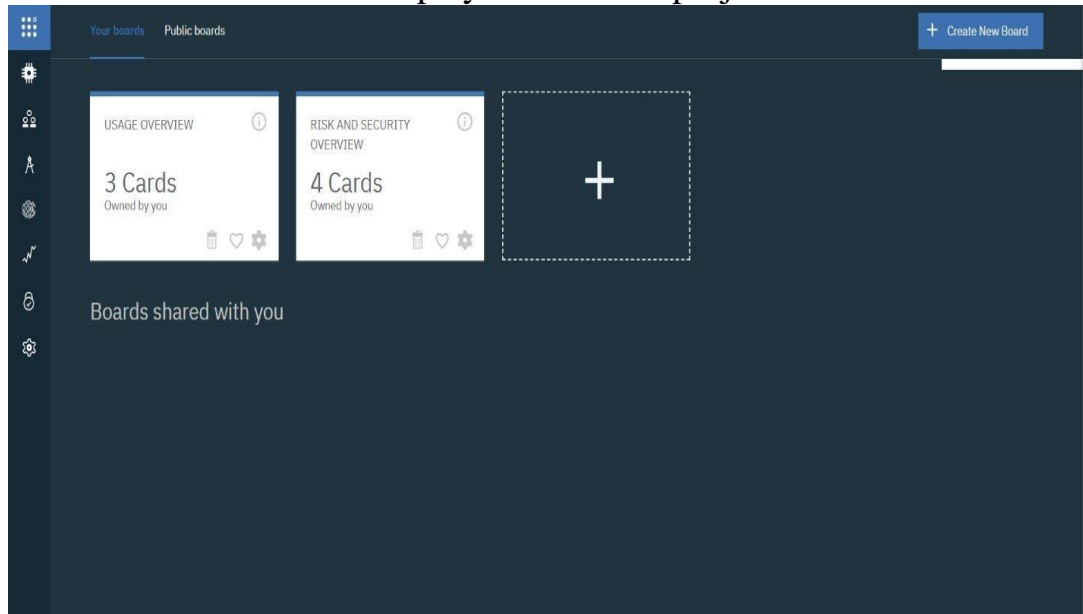

25.. Clicking on the device tab we can now see the added device. Clicking on it will display the other details. It has different tabs like Identity, Device Information, State and login.

In a similar way, we can create n number of devices with a 50 per page limit as per the requirement of our project.

26.Create the ibm Watson IOT Platform.

27. The Boards will display card for the project

CONCLUSION:

An IBM Watson cloud for IoT and a device is created
